About Jago Foundation

Jago Foundation is a child development organization registered in 1997 has been working with underprivileged children, youth and families from the most remote, extremely backward and hard-to-reach areas, with a vision to build “free children in rural Jharkhand from exploitation, so that they can be happy, receive education and live in a safe environment”.

Jago Foundation currently operates in four districts of Jharkhand where predominantly the Dalit and tribal communities reside, with plans to expand to more districts in the state as we stabilize. These areas have very few government services; and no other civil society organization is active here that focuses on children.

Over the years, based on the experiential learning, emerging needs and availability of resources, the organization started working in the neighboring districts of Giridih. Since our registration in 1997, we have grown to now work with 35,000+ children, women, families, communities and marginalized groups in 158+ villages in four districts of Jharkhand. Jago Foundation currently operates in four districts of Jharkhand where predominantly the Dalit and tribal communities reside, with plans to expand to more districts in the state as we stabilize.

Our Vision
To shape an equitable society through the education and upliftment of marginalized communities.

Our Mission
Children grow up in safe, happy and nurturing community. Children in rural Jharkhand to be freed from exploitation, enjoy playing and receive education.

Youth learn attitudes and appropriate skills to find livelihood and lead better lives.
Dear Jago Supporters,

Last year we saw people battling with the second wave of Covid-19 and its after effects. Child abuse, child marriage cases were seen increasing, education was completely affected, unemployment and poverty were clearly seen in the family. There was fear and superstition in the society regarding corona vaccination. This further exacerbated their vulnerabilities, especially their access to proper health care.

We adapted our project activities to the circumstances, working hard to prevent child abuse, all the while ensuring emergency COVID-19 relief and recovery. Our biggest attraction this year was our mass vaccination and awareness campaign, which reached out to over 1 lakh people.

Our teamwork, dedication and endless care for the children helped us in our endeavors. We thank all of our donors and supporters whose support has been invaluable. This report highlights our work over the past year. We are happy to share it with you.

Sincerely,
Baidyanath
Pooja, Pinki and Hemanti are the first few girls to complete school till class 10. All hail from the remote village of Rajpura of Sankh Panchayat in Jharkhand. Girl children find it difficult to access higher education past 8th standard in this village. The nearest school is 15 km away and commute is difficult as well. Children have to walk through 3km of dense forest and rest is covered via transportation to reach a school at Gawan. Until 2018, no girls studied past 8th standard in the village. As a member of Bal Manch, Rajpura, Pooja shared her situation in a meeting. Subsequently, a Jago foundation volunteer visited their house and motivated her mother to re-enroll Pooja in the school. The Jago team members also understood the family’s financial situation and gave them a scholarship of ₹1000 per month under their RMI initiative.

The Jago team spoke to the children of Bal Manch to identify other girls who were compelled to give up education. In another meeting, Pinki Kumari and Hemanti Kumari also expressed their grief of not being able to study after the 8th standard. Jago volunteers visited the families of girls to persuade their parents to send them for higher education. After a series of counselling sessions the parents agreed to send their daughters. Today Pooja, Pinki and Hemanti are studying in higher classes and paved the path for other girls from Rajpura to do so as well. The girls of Rajpura village are thankful to Jago and RMI project.
Our Programmes in 2021-22 promoted the well-being of children within their communities

1. *Ensuring the Rights and education of the children:* Campaigning against child labor; getting children into school though a range of supporting initiatives including:
   a) **Forming children’s and adolescent’s groups** to create awareness on child rights, health, nutrition and education. Participating children and adolescent carried these messages to their communities, thereby preventing several cases of child labor, child abuse, child exploitation and child marriage. Children clubs also take the initiative for any development work in the village.
   b) **Early education** ensuring functional Aanganwadi for children under five also given access to pre-primary education, and library have been setup for children to access knowledge.
   c) **Formal education supports** for vulnerable children and victims of child labor, both pre and post lockdown.
   d) **Strengthening of child protection institutions** (VLCPC, SMC) through sensitization, training and capacity building.

2. **Livelihood Generation** families were provided access to a revolving fund through which they invested in income generation activities for additional livelihood. The project also provided the families skill training in these activities. The families repay the sum with a minimum service charge and the fund is further revolved for other families to use.

3. **Legal Awareness programme** conducted legal awareness among villagers on child rights, child protection, land rights, social justice, tribal act etc. Activity includes:
   a) **Access to social security and protection scheme** providing families with awareness on and access to government social security and protection schemes include pension, job cards, housing scheme etc.
   b) **Awareness campaign**- Community members and children were provided awareness on child rights and child protection.

4. **COVID-19 Awareness**- The objective of the awareness program was twofold- one to bust myth/fears around vaccination, encouraging people to come forward and get their doses, the second was to continue following COVID appropriate practices such as social distancing, wear mask properly etc.
5. **COVID-19 Vaccination** the intervention included organizing vaccination camp in remote rural area of Giridih district. Health care staff were supported with necessary equipment and transportation. Also organized training for frontline health worker like ANM and ASHA.

6. **Health & Nutrition** Increasing access to proper nutrition and quality healthcare.

7. **Child Line se Dosti** Spread the message about the Children’s helpline CHILDLINE 1098. With this campaign child made friends of CHILDLINE to DC, SP, DSWO, DCPO, CWC, SDPO, Police personal, BDO, PRI member, Media, Children and Community members covered under this campaign.

8. **Ensuring Girl Child Education**, a main reason why girls drop out of schools in the Mica region is due the huge distance between the village and their schools. Provision of cycle has helped solve this issues, increasing girl child enrollment and ensuring regular attendance. In 2021, 95 girls were given cycles, 750 girls were supported with study material and 385 girls were enrolled in school.

---

**Theme of the Work**

**Addressing issues**

- Child Labour
- Child Trafficking
- Child Marriage
- Child Abuse
- Child Sexual Exploitation

**Groups we work with**

- Children
- Adolescent and Youth
- Women mother and child
- Marginal Farmers
- Dalit & Tribal, economically backward section of the society
- Differently able persons and persons with health disorder
Impact 2021

10465 Children & adults educated on child rights
6 Aanganwadi centers Modeled
4 School Modeled
1485 Children access educational services
1200+ Children received various training such as child protection mechanism
386 Children directly saved from exploitation
28 Mobile Library established in village

750 Children supported with study material
95 Children given bicycle
660 Homestead Nutrition gardens established
1460 Children received Homebased nutrition garden training
74 School Management Committee strengthen
52 Village level child protection committee strengthen

1441 Families linked to social welfare scheme
439 Families linked to social protection scheme
126 Families newly supported through revolving fund in 2021-22
108 Families newly IGA supported
208 Families saw an increase in income 2021
237 Children rescued from child labour
163735 People reached through awareness activities during pandemic
352 Frontline Health Worker Trained

85 Child marriage stopped, in which 18 Girls enrolled in Kasturba school
461 Tree planted
1 Safe Drinking facilities for community created
22 Families received assets support for extend the livelihood
24 Students received scholarship support for education
27000 Families facilitated with Ration kits
602 Vaccination Camp organized
103075 People Vaccinated with Dose I
99652 People Vaccinated with Dose II
Best Practices 2021

Balmanch Facilitated community learning

The Lockdown and consequent closure of school made children from the mica belt vulnerable from exploitation. Moreover, many families could not afford smartphone/laptop for children to access education online/digitally. Keeping this mind, Balmanch group pooled in digital resources from households and created a community learning setup where children gathered in small groups in area with internet access, and continued their learning through government E-learning portals. Balmanch members also collected learning material from various sources and downloaded it on the devices for children access.

Self Help Group Members act as change agents

During the pandemic, when project activities came to halt, a few SHG members themselves collected savings and repayments individually from the members and prevented overdue.

The member acts as agent of change and supported to implement the activities in the field without staff intervention. They identified people in need in their villages and distributed COVID relief kits.
Case Stories

10 Years old Rani Tudu (Name Changed) started picking mica at the age of 7. Although working, she was fairly regular to school until the pandemic struck. During the lockdown, Rani wake up at dawn, cooked for her parents and two siblings and set off work at 7am and returned only at 4 pm.

“There was rocks and deep pits”, she said “I wanted to study, I didn’t want to be here”

Through the TdH project, Rani was provided with study material- pena, notebooks, bag and was also introduced to digital learning through a projector.

Seeing Rani happy and positively engaged, her parents decided not to send her to mines.

A nutritious beginning for a healthy life

Krish was a 2-year-old malnourished child who was identified during a nutrition survey by Jago’s team. Jago's nutrition worker Tunni talked to his parents and got Krish treated at Malnutrition Treatment Center Rajdhanwar. After being fed for 15 days under the supervision of a doctor, Krish’s health improved significantly and is walking well. Jago Foundation works in collaboration with RMI under the CESAM project for the education and health of people in the mica mining area.

Join us in our plans ahead to:
• Expand our services to 25 more villages in the mica mining area, enrolling 5,000+ children to school.
• Help 3,500+ girls in Giridih complete at least 1 years of schooling.
• Provide livelihood support to 500 more families.
• Support colonies of leprosy affected people in Dhanbad, Bokaro, Ramgarh and Jamtara.
• Extend our work to the entire district of Giridih to prevent child labour and child marriage, which has increased due to Covid.

A Special Appeal
Your Support of Rs. 3000/- will help 1 Child move away from the worst forms of child labour.
Will You join us?
